RELEVANT EXPERIENCE

SonoSim Inc. — *Frontend Engineer*

Los Angeles, CA | October 2021 - Present

- Increase output of frontend deliverables by 100% and reduce bug throughput by 50% as a key member of a small web development team
- Design and implement more than 10 new features in a short timespan
- Consolidate 3 separate Angular applications into one larger application to better serve our 100,000+ users, all in one convenient location
- Apply a natural talent for UX/UI design to drive an increase in user engagement and accessibility
- Add powerful analytics capabilities to our applications to better document and understand our users' interactions with our web applications

Encanto Labs — *Junior Software Developer*

Los Angeles, CA | April 2021 - September 2021

- Developed a new and improved version of enterprise data visualization software that facilitates logistics and risk management operations
- Created helpful new features that support a more intuitive UX and improve customers' ability to design and implement their own no-code workflows

Self-Employed — *Freelance Web Developer*

Los Angeles, CA | November 2020 - April 2021

- Produced a fully responsive, dynamic podcast landing site for a client using Python, Django, PostgreSQL and Materialize CSS
- Personally managed every stage of development from planning, UX/UI design and implementation, to testing and deployment

Great ShakeOut — *Junior Web Developer/Translator*

Los Angeles, CA | March 2012 - March 2016

- Maintained multilingual HTML content of 25+ different Great ShakeOut regional websites, annually visited by millions of people worldwide
